

YEAR 3

Year 3: Detail of content to be introduced (statutory requirement)	
Word	<p>Formation of nouns using a range of prefixes [for example <i>super-</i>, <i>anti-</i>, <i>auto-</i>]</p> <p>Use of the forms <i>a</i> or <i>an</i> according to whether the next word begins with a consonant or a vowel [for example, <i>a rock</i>, <i>an open box</i>]</p> <p>Word families based on common words, showing how words are related in form and meaning [for example, <i>solve</i>, <i>solution</i>, <i>solver</i>, <i>dissolve</i>, <i>insoluble</i>]</p>
Sentence	<p>Expressing time, place and cause using conjunctions [for example, <i>when</i>, <i>before</i>, <i>after</i>, <i>while</i>, <i>so</i>, <i>because</i>], adverbs [for example, <i>then</i>, <i>next</i>, <i>soon</i>, <i>therefore</i>], or prepositions [for example, <i>before</i>, <i>after</i>, <i>during</i>, <i>in</i>, <i>because of</i>]</p>
Text	<p>Introduction to paragraphs as a way to group related material</p> <p>Headings and sub-headings to aid presentation</p> <p>Use of the present perfect form of verbs instead of the simple past [for example, <i>He has gone out to play</i> contrasted with <i>He went out to play</i>]</p>
Punctuation	<p>Introduction to inverted commas to punctuate direct speech</p>
Terminology for pupils	<p>preposition conjunction</p> <p>word family, prefix</p> <p>clause, subordinate clause</p> <p>direct speech</p> <p>consonant, consonant letter vowel, vowel letter</p> <p>inverted commas (or 'speech marks')</p>

Useful definitions:

<p>adjective</p>	<p>The surest way to identify adjectives is by the ways they can be used:</p> <ul style="list-style-type: none"> ▪ before a noun, to make the noun's meaning more specific (i.e. to <u>modify</u> the noun), or ▪ after the verb <i>be</i>, as its <u>complement</u>. <p>Adjectives cannot be modified by other adjectives. This distinguishes them from <u>nouns</u>, which can be.</p> <p>Adjectives are sometimes called 'describing words' because they pick out single characteristics such as size or colour. This is often true, but it doesn't help to distinguish adjectives from other word classes,</p>	<p><i>The pupils did some really <u>good</u> work.</i> [adjective used before a noun, to modify it]</p> <p><i>Their work was <u>good</u>.</i> [adjective used after the verb <i>be</i>, as its complement]</p> <p>Not adjectives:</p> <p><i>The lamp <u>glowed</u>.</i> [verb]</p> <p><i>It was such a bright <u>red</u>!</i> [noun]</p> <p><i>He spoke <u>loudly</u>.</i> [adverb]</p> <p><i>It was a French <u>grammar</u> book.</i> [noun]</p>
<p>adverb</p>	<p>The surest way to identify adverbs is by the ways they can be used: they can <u>modify</u> a <u>verb</u>, an <u>adjective</u>, another adverb or even a whole clause.</p> <p>Adverbs are sometimes said to describe manner or time. This is often true, but it doesn't help to distinguish adverbs from other word classes that can be used as <u>adverbials</u>, such as <u>preposition phrases</u>, <u>noun phrases</u> and <u>subordinate clauses</u>.</p>	<p><i>Usha <u>soon</u> started snoring <u>loudly</u>.</i> [adverbs modifying the verbs <i>started</i> and <i>snoring</i>]</p> <p><i>That match was <u>really</u> exciting!</i> [adverb modifying the adjective <i>exciting</i>]</p> <p><i>We don't get to play games <u>very</u> often.</i> [adverb modifying the other adverb, <i>often</i>]</p> <p><i><u>Fortunately</u>, it didn't rain.</i> [adverb modifying the whole clause 'it didn't rain' by commenting on it]</p> <p>Not adverbs:</p> <ul style="list-style-type: none"> ▪ <i>Usha went <u>up the stairs</u>.</i> [preposition phrase used as adverbial] ▪ <i>She finished her work <u>this evening</u>.</i> [noun phrase used as adverbial] ▪ <i>She finished <u>when the teacher got cross</u>.</i> [subordinate clause used as adverbial]

<p>clause</p>	<p>A clause is a special type of <u>phrase</u> whose <u>head</u> is a <u>verb</u>. Clauses can sometimes be complete sentences. Clauses may be <u>main</u> or <u>subordinate</u>.</p> <p>Traditionally, a clause had to have a <u>finite verb</u>, but most modern grammarians also recognise non-finite clauses.</p>	<p><i>It was raining.</i> [single-clause sentence]</p> <p><i>It was raining but we were indoors.</i> [two finite clauses]</p> <p><i>If you are coming to the party, please let us know.</i> [finite subordinate clause inside a finite main clause]</p> <p><i>Usha went upstairs to play on her computer.</i> [non-finite clause]</p>
<p>conjunction</p>	<p>A conjunction links two words or phrases together.</p> <p>There are two main types of conjunctions:</p> <ul style="list-style-type: none"> ▪ <u>co-ordinating</u> conjunctions (e.g. <i>and</i>) link two words or phrases together as an equal pair ▪ subordinating conjunctions (e.g. <i>when</i>) introduce a <u>subordinate clause</u>. 	<p><i>James bought a bat and ball.</i> [links the words <i>bat</i> and <i>ball</i> as an equal pair]</p> <p><i>Kylie is young but she can kick the ball hard.</i> [links two clauses as an equal pair]</p> <p><i>Everyone watches when Kyle does back-flips.</i> [introduces a subordinate clause]</p> <p><i>Joe can't practise kicking because he's injured.</i> [introduces a subordinate clause]</p>

<p>noun</p>	<p>The surest way to identify nouns is by the ways they can be used after <u>determiners</u> such as <i>the</i>: for example, most nouns will fit into the frame "The __ matters/matter."</p> <p>Nouns are sometimes called 'naming words' because they name people, places and 'things'; this is often true, but it doesn't help to distinguish nouns from other <u>word classes</u>. For example, <u>prepositions</u> can name places and <u>verbs</u> can name 'things' such as actions.</p> <p>Nouns may be classified as common (e.g. <i>boy, day</i>) or proper (e.g. <i>Ivan, Wednesday</i>), and also as countable (e.g. <i>thing, boy</i>) or non-countable (e.g. <i>stuff, money</i>). These classes can be recognised by the determiners they combine with.</p>	<p><i>Our <u>dog</u> bit the <u>burglar</u> on his <u>behind</u>!</i></p> <p><i>My big <u>brother</u> did an amazing <u>jump</u> on his <u>skateboard</u>.</i></p> <p><i><u>Actions</u> speak louder than <u>words</u>.</i></p> <p>Not nouns:</p> <ul style="list-style-type: none"> ▪ <i>He's <u>behind</u> you!</i> [this names a place, but is a preposition, not a noun] ▪ <i>She can <u>jump</u> so high!</i> [this names an action, but is a verb, not a noun] <p>common, countable: <i>a <u>book</u>, <u>books</u>, two <u>chocolates</u>, one <u>day</u>, fewer <u>ideas</u></i></p> <p>common, non-countable: <i><u>money</u>, some <u>chocolate</u>, less <u>imagination</u></i></p> <p>proper, countable: <i><u>Marilyn</u>, <u>London</u>, <u>Wednesday</u></i></p>
<p>perfect</p>	<p>The perfect form of a <u>verb</u> generally calls attention to the consequences of a prior event; for example, <i>he has gone to lunch</i> implies that he is still away, in contrast with <i>he went to lunch</i>. 'Had gone to lunch' takes a past time point (i.e. when we arrived) as its reference point and is another way of establishing time relations in a text. The perfect tense is formed by:</p> <ul style="list-style-type: none"> ▪ turning the verb into its past <u>participle inflection</u> ▪ adding a form of the verb <i>have</i> before it. <p>It can also be combined with the <u>progressive</u> (e.g. <i>he has been going</i>).</p>	<p><i>She <u>has downloaded</u> some songs.</i> [present perfect; now she has some songs]</p> <p><i>I <u>had eaten</u> lunch when you came.</i> [past perfect; I wasn't hungry when you came]</p>

<p>preposition</p>	<p>A preposition links a following <u>noun</u>, <u>pronoun</u> or <u>noun phrase</u> to some other word in the sentence. Prepositions often describe locations or directions, but can describe other things, such as relations of time.</p> <p>Words like <i>before</i> or <i>since</i> can act either as prepositions or as <u>conjunctions</u>.</p>	<p><i>Tom waved goodbye <u>to</u> Christy.</i> <i>She'll be back <u>from</u> Australia <u>in</u> two weeks.</i></p> <p><i>I haven't seen my dog <u>since</u> this morning.</i></p> <p>Contrast: <i>I'm going, <u>since</u> no-one wants me here!</i> [conjunction: links two clauses]</p>
<p>preposition phrase</p>	<p>A preposition phrase has a preposition as its head followed by a noun, pronoun or noun phrase.</p>	<p><i>He was <u>in bed</u>.</i> <i>I met them <u>after the party</u>.</i></p>
<p>present tense</p>	<p><u>Verbs</u> in the present tense are commonly used to:</p> <ul style="list-style-type: none"> ▪ talk about the present ▪ talk about the <u>future</u>. <p>They may take a suffix <i>-s</i> (depending on the <u>subject</u>).</p> <p>See also <u>tense</u>.</p>	<p><i>Jamal <u>goes</u> to the pool every day.</i> [describes a habit that exists now]</p> <p><i>He <u>can</u> swim.</i> [describes a state that is true now]</p> <p><i>The bus <u>arrives</u> at three.</i> [scheduled now]</p> <p><i>My friends <u>are</u> coming to play.</i> [describes a plan in progress now]</p>
<p>subordinate clause</p>	<p>A clause which is <u>subordinate</u> to some other part of the same <u>sentence</u> is a subordinate clause; for example, in <i>The apple that I ate was sour</i>, the clause <i>that I ate</i> is subordinate to <i>apple</i> (which it <u>modifies</u>). Subordinate clauses contrast with <u>co-ordinate</u> clauses as in <i>It was sour but looked very tasty</i>. (Contrast: <u>main clause</u>)</p> <p>However, clauses that are directly quoted as direct speech are not subordinate clauses.</p>	<p><i>That's the street <u>where Ben lives</u>.</i> [relative clause; modifies <i>street</i>]</p> <p><i>He watched her <u>as she disappeared</u>.</i> [adverbial; modifies <i>watched</i>]</p> <p><i><u>What you said</u> was very nice.</i> [acts as <u>subject</u> of <i>was</i>]</p> <p><i>She noticed <u>an hour had passed</u>.</i> [acts as <u>object</u> of <i>noticed</i>]</p> <p>Not subordinate: <i>He shouted, "Look out!"</i></p>

<p>verb</p>	<p>The surest way to identify verbs is by the ways they can be used: they can usually have a <u>tense</u>, either <u>present</u> or <u>past</u> (see also <u>future</u>).</p> <p>Verbs are sometimes called 'doing words' because many verbs name an action that someone does; while this can be a way of recognising verbs, it doesn't distinguish verbs from <u>nouns</u> (which can also name actions). Moreover many verbs name states or feelings rather than actions.</p> <p>Verbs can be classified in various ways: for example, as <u>auxiliary</u>, or <u>modal</u>; as <u>transitive</u> or <u>intransitive</u>; and as states or events.</p>	<p><i>He <u>lives</u> in Birmingham.</i> [present tense]</p> <p><i>The teacher <u>wrote</u> a song for the class.</i> [past tense]</p> <p><i>He <u>likes</u> chocolate.</i> [present tense; not an action]</p> <p><i>He <u>knew</u> my father.</i> [past tense; not an action]</p> <p>Not verbs:</p> <ul style="list-style-type: none"> ▪ <i>The <u>walk</u> to Halina's house will take an hour.</i> [noun] ▪ <i>All that <u>surfing</u> makes Morwenna so sleepy!</i> [noun]
